

SAP Lumira

SAP Lumira is a software solution that helps businesses assess their performance and activity data sets through the use of rich visualisations and filters. This course covers the use of Lumira to acquire and prepare your data, create visualisations from the data for presentation in stories which may then be shared with others.

On completion, delegates will be able to:

- Explain the role of SAP Lumira
- Connect to and acquire data from different data sources
- Cleanse and enhance the dataset
- Combine datasets
- Create visualisations using crosstabs, charts, filtering and trellis mode
- Compose stories
- Publish and share content

Who should attend?

This course is aimed at users who wish to explore the core functionality of Lumira and produce valuable analyses of their data. Or those who wish to be more self-sufficient and use a client based tool to give them increased control over their data visualisations.
