

Go-Live Web Intelligence Workshop

SAP Web Intelligence is a powerful reporting tool that allows users to take control of their data and produce powerful reports which save time and effort, but translating the techniques from the classroom into real life environments can prove challenging.

This workshop takes advantage of Acuma consultants' in-depth knowledge of business intelligence and the use of Web Intelligence to offer delegates a unique training opportunity. Run exclusively as a private on-site event, the free format of the workshop allows structured techniques to be placed alongside actual use of the delegate's live environment to develop reporting solutions there and then in the classroom.

On completion, delegates will be able to:

- Apply a range of advanced reporting techniques to their Web Intelligence documents.
- Utilise live reports developed with the consultant trainer.
- Apply best practice to their development of Web Intelligence documents.
- Understand more about the use of their own universe environment.

Who should attend?

This course is aimed at users who need that little extra help to apply their knowledge to their own environment or who are facing challenges meeting specific reporting requirements.

Software Versions Applicable

All versions of Web Intelligence/Rich Client.

Prerequisites

Attendance on Web Intelligence Reporting or equivalent experience.

Access to the customer's production reporting environment.

Course Duration

1 day

Related and follow-on courses

Advanced Web Intelligence Reporting

Course Contents

Pre-course Assessment

- Our education consultant will liaise with delegates prior to the course.
- Delegates are requested to provide examples of reports they would like to review during the day.
- The education consultant defines a loose topic agenda and format for the day using the feedback received.

Go-Live Reporting

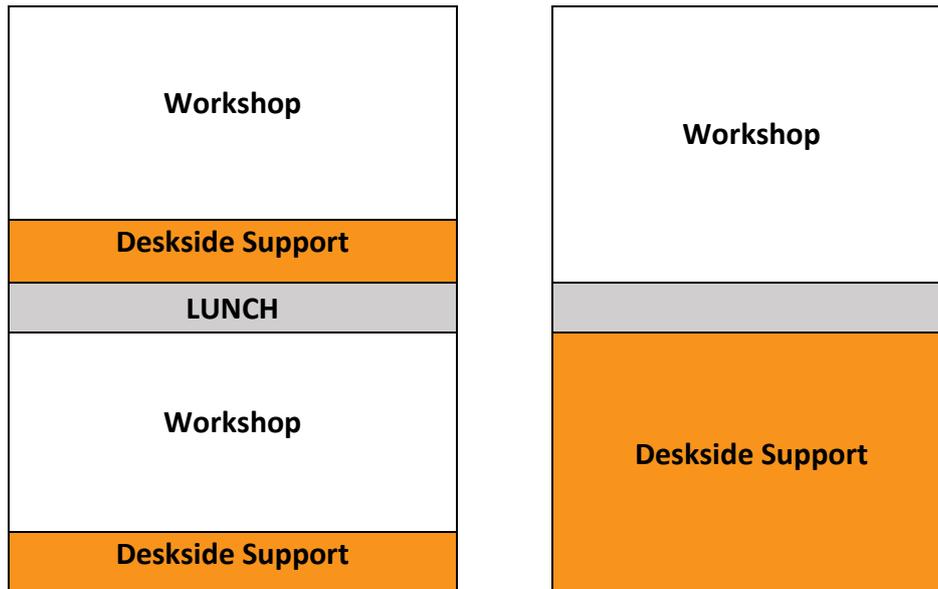

In a workshop format our consultant will work through the real examples brought by delegates. Solutions are designed and the resulting methods walked through with delegates, highlighting the thought process, techniques and best practices involved. This may involve refreshers on standard and advanced report techniques.

Deskside Support

The day may also include an element of deskside support for delegates whereby the consultant works with them one to one, looking at their own specific issues.

Delivery Framework

There is no strict agenda for a Go-Live workshop however there are frameworks we will utilise based upon the learning requirements. These may involve a morning spent in a workshop format, followed by an afternoon of deskside support or alternating these aspects within the morning and afternoon sessions. The education consultant will make a recommendation based upon the challenges set by the delegates to create a completely bespoke experience.

Customer Feedback

The 'Go-Live' Workshop format has been performed for numerous customers. Read on for some of their thoughts on the experience.

'I cannot believe how much we achieved. Problems have been solved and I really understand how to do it again and again.'

'I thought I knew Web Intelligence – but you have shown me how to really exploit it!'

Acuma Education

All Acuma courses are delivered by trainers who are highly experienced consultant practitioners. This rich project experience coupled with professional training skills helps delegates to focus on how the course contents can be put into practice in their workplace.

Acuma delivers courses from dedicated training facilities in Manchester, Birmingham and London, but also deliver training offsite using suites of laptops, with the option to customise courses to use your own business data and tailored to your exact training needs. The most appropriate training format depends upon your training objectives, number of learners, timescales, budgets and delivery logistics. Whatever your needs, Acuma will find the approach most suited to them.

Acuma Education's seal of quality is demonstrated through consistent achievement of the prestigious "Gold Standard" from the Learning and Performance Institute.
